## Provision cooling

### CUSTOMER

Leading offshore operator  
in the North Sea

### THE PROJECT

The project was performed as a  
collaboration between Conixi and SubC  
Partner.

The project was to demolish 2 existing cold  
stores, and to remove a 20' container that  
worked as a combined dry store and freeze  
store and build up new cold stores and  
install a new freeze- and drystore  
containers.

Furthermore the scope included a new  
cooling skid and distribution panel which  
works as a control panel for the cooling  
systems
